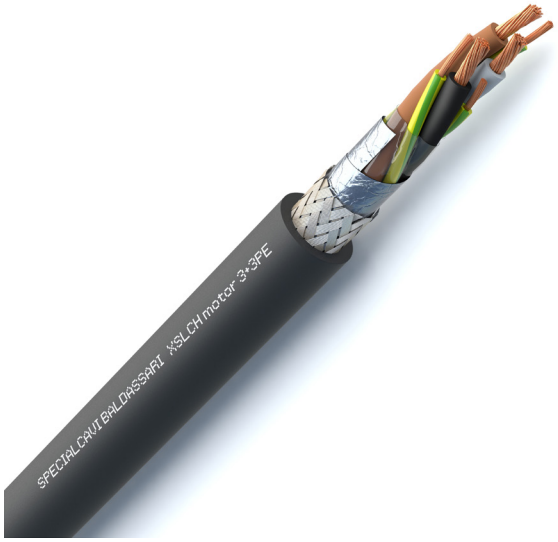
SPECIALCAVI **BALDASSARI**

POWER, CONTROL AND SIGNALLING

XSLCH-J MOTOR | 3+3PE LSZH

Marking: <meters> CE 0987 SPECIALCAVI BALDASSARI XSLCH-J <formation> IEC 60332-3-24 <lot> <year> B2CA-S1A,D0,A1



MANUFACTURING CHARACTERISTICS

Conductor:
Flexible bare copper, class 5
Insulation:
Cross-linked LSZH compound
Stranding:
Cores stranded in concentric layers
Wrapping and protection:
Overall polyester tape
Shield:
1st shield:
Overall aluminium/polyester tape
2nd shield:
Overall tinned copper braid
Outer sheath:
LSZH thermoplastic compound
Colours:
Cores identification:
Brown + Black + Grey + 3 x Green/Yellow
Outer sheath colour:
Black (based on RAL 9005)

ELECTRICAL CHARACTERISTICS

Nominal operating voltage: 0.6/1kV
Maximum operating voltage: 1.8kV D.C. and 1.2kV A.C.
Testing voltage: 4000V

STANDARDS

IEC 60228
IEC 60332-3-24 Cat.C

REACTION TO FIRE CLASS

EN 50575:2016 $B2_{ca}$ - s1a, d0, a1

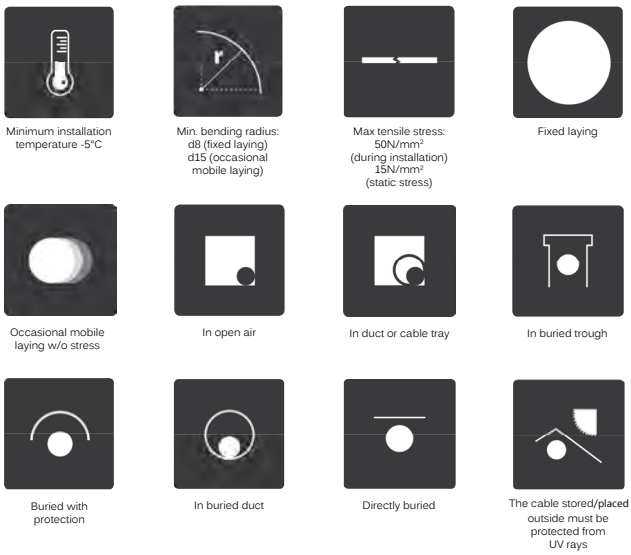
TEMPERATURES

Minimum working temperature:
- Fixed laying -40°C
- Occasional mobile laying w/o stress -5°C

Maximum working temperature:
- Fixed laying +90°C
- Occasional mobile laying w/o stress +90°C

Maximum short circuit temperature: +250°C

LAYING CONDITIONS



ON REQUEST

- Customized cores identification/outer sheath colours

APPLICATIONS

Cable conforms to the requirements in the Construction Products Regulations (CPR EU 305/11), aimed at limiting the production and diffusion of fire and smoke.
Shielded LSZH cable characterized by its special construction, used to power motors with frequency converters when full electromagnetic compatibility (EMC) is required.
The symmetrical construction of the cable (3 + 3PE) ensures the symmetry of the supply voltages on the motor terminals. The cable, made entirely of halogen-free materials, does not emit harmful substances in the event of a fire.
Suitable for both static and dynamic connections (occasional movement) in industrial plants, process lines and machines operating in dry or damp environments.
If stored/placed outdoors, the cable must be protected from UV rays.
Direct or indirect underground laying is permitted (presence of water condiction AD7).
